

DOYLE CONNER
COMMISSIONER

STATE OF FLORIDA
DEPARTMENT OF AGRICULTURE
THE CAPITOL
TALLAHASSEE
32304

Dear Fellow Citizens:

Current and accurate statistical information plays an important role in the development of any effective marketing program.

Recognizing this fact, the Florida Department of Agriculture has cooperated with the United States Department of Agriculture in compiling this statistical live-stock summary for the State of Florida.

We trust that you will find this report a valuable aid.

Sincerely,

A handwritten signature in cursive script that reads "Doyle Conner".

Doyle Conner
Commissioner

LIVESTOCK SUMMARY

INTRODUCTION

This publication continues the series began in 1963 and is designed to bring together under one cover available livestock statistics from various sources.

For the most part, this issue presents production and inventory statistics from 1950 to date and price statistics 1945 to date. The production, disposition, and income estimates for 1960-64 have been revised on the basis of data obtained from the 1964 Census of Agriculture and other data which have become available since the original estimates were made. Those desiring historical data prior to 1945 may request the 1963 issue which presents the entire series of record.

Copies of the 1963-1967 issues are available free upon request as long as the supply lasts by writing to the Florida Crop and Livestock Reporting Service, 1222 Woodward Street, Orlando, Florida 32803.

CATTLE AND CALVES ON FARMS

On January 1, 1968 all cattle and calves on farms totaled 1,788,000 head, down 5 percent from a year earlier. Beef cattle numbers increased steadily from 1950 reaching a peak of 1,661,000 head in January 1, 1965. Beef cattle constituted 87 percent of all cattle and calves on farms January 1, 1968, and dairy animals 13 percent. This compares with 80 percent of total for beef animals January 1, 1950 and 20 percent dairy cattle. Dairy cattle and calves on farms January 1, 1968 totaled 241,000, no change from a year earlier. Dairy numbers reached their peak January 1, 1960 when 340,000 head were recorded. Numbers have declined steadily from this peak with an upturn noted the past three years. Brood cow numbers have held steady the last three years and constituted 55 percent of total beef cattle on January 1, 1968.

On January 1, 1968, FLORIDA ranked 23rd in total cattle and calf numbers in the Nation, 20th in beef cattle and 29th in dairy cattle. In 1967, 355,276 cattle and calves were shipped out of Florida, 35.7 percent of the total marketings in the State.

Calves born in 1967 totaled 741,000 head, 68 percent of cows 2 years and older. Florida's calving rate continues to rank among the lowest in the Nation. Through the use of better bulls, closer culling, and better management and feeding practices, many Florida cattlemen have greatly increased their calf crop in recent years.

Cattle and calves on feed January 1, 1968, totaled 62,000 head, 19 percent lower than a year earlier, and 29 percent below the January 1 peak reached in 1963.

CASH RECEIPTS

Cash receipts from cattle and calves marketed in 1967 set a new high totaling \$130,146,000, up 27 percent from 1966. The increase resulted from both greater marketings and higher prices and topped the high of \$102,146,000 set in 1966. Cattle prices in 1967 averaged \$20.60 per hundredweight compared with \$20.30 in 1966. Calf prices averaged \$24.30 per hundredweight compared to \$23.30 in 1966. Marketings of cattle and calves in 1967 totaled 610,816,000 pounds, 25 percent more than the previous year. Receipts from hog marketings totaled \$13,176,000 in 1967, a decrease of 26 percent over 1966. Greater supply and lower prices contributed to the decrease. Prices received for hogs averaged \$18.30 per hundredweight in 1967, \$4.10 lower than the previous year's price.

HOGS ON FARMS

The January 1, 1968 hog inventory in Florida totaled 299,000 head, 9 percent above a year earlier. Hog numbers have been gradually declining since the early 1950's. Pig's saved in 1967 totaled 442,000 head, slightly less than 1966. Pigs per litter in the spring of 1967 averaged 6.9 compared with 7.6 a year earlier. Fall 1967 farrowings averaged 7.1 pigs per litter compared to 7.1 a year earlier.

On January 1, 1968 in the UNITED STATES there were 54,263,000 hogs and pigs, an increase of 2 percent over January 1, 1967. All sheep and lambs on hand in the UNITED STATES January 1, 1968 totaled 22,122,000 head, 7 percent below a year earlier.

1/ Balance sheet estimates. Total of marketings, farm slaughter, deaths, and on hand end of year equals total of calf crop, inshipments and on hand beginning of year. 2/ Not strictly a calving rate. Figure represents calves born expressed as percentage of the number of cows and heifers 2 years old and over on farms and ranches January 1. 3/ Excludes interfarm sales, but includes animals custom slaughtered for use on farms where produced. 4/ Does not include animals custom slaughtered for farmers at commercial establishments.

1/ Civilian consumption only, beginning 1941. 2/ Approximately at wholesale level of distribution. 3/ Equivalent eviscerated weight basis. Although most of the poultry was sold in dressed form until the 1940's, most is now sold ready to cook. The entire series was put on the latter basis to achieve comparability. 4/ Measured approximately at wholesale level of distribution. Average weight of eggs 1909-46 is assumed to be 1.5 pounds per dozen; conversion factor subsequently increased 0.01 pound each year through 1952, remained at 1.56 through 1956, thereafter 1.57. This change in factor allowed for the increasing size of eggs marketed. 5/ Not Available. 6/ Preliminary.
